

Automatic user import

Fronter has years of experience supporting different User import/MIS system integrations, facilitating smooth user imports at more than 2000 schools and organisations around the world.

The Fronter interface is consistent with the IMS standard for import and export of data and metadata, as used by the majority of Management Information Systems.

“The schools are required to set up the export routine from their local Management Information System and to make sure that the data the system is holding is accurate. Fronter will take care of the rest.”

Aleksander Pettersen
Fronter Project Manager

Fronter currently offers integration with a variety of MIS/SAS including:

Norway: Mstas FS Sats Extens Oppad Cerebrum Buddy	Sweden: Extens Procapita Hannah	Denmark: LUDUS LUDUS Sundhed GAS Lectio SIS Easy	Finland: The User Administrative System for Helsinki City.
UK: RM Integris Pearson Phoenix Gold Capita Sims.net Serco CMIS Pearson E1	Netherlands Peoplesoft Magister @VO nOISe	Poland VULCAN Optivum	Germany SeminarIS

For more information please visit fronter.com or contact your local Fronter office.

* Please Note: Automatic User import is a Fronter PlusPack. You must already have a valid Fronter installation to subscribe.
