

Fronter Webparts enables seamless integration between Fronter and Microsoft SharePoint portal. Now users will be able to log into Fronter from their SharePoint portal, and access elements located on the Fronter Today portal.

Why Fronter Webparts

Single Sign On - With Fronter Webparts, you will have single sign on integration with your Microsoft SharePoint portal.

Customise - SharePoint administrators can customise and implement their own design for their Webpart.

Access to content - Users can access a selection of content from the Fronter Today portal on their SharePoint page:

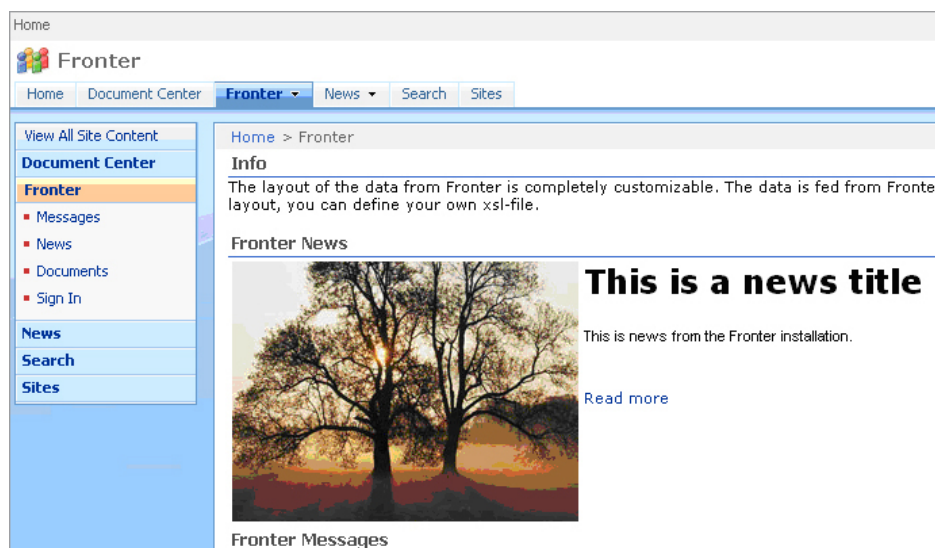

- News
- Messages
- Documents
- Calendar
- Discussion contributions
- Notifications
- Login link

How does Webparts work

Installation - The Fronter Webpart is installed on the SharePoint server.

Setup - The Fronter administrator will enter the SharePoint setup and add a Webpart to the desired SharePoint pages.

Customisation - Users will receive personalised information from the Fronter installation on their SharePoint page, directly from their Fronter Today portal.

For more information please visit fronter.com or contact your local Fronter office.

* Please Note: Webparts is a Fronter PlusPack. You must already have a valid Fronter installation to subscribe.
